Suspended sanitary ware

Detail: PREMIUM system installation

- Full brick in brick
- Semi-solid brick (perforated vertically) in brick

ADVANTAGES

- The packages are complete with supports and collars to fix the adduction and discharge components.
- For bidet installation, the height adjustable pre-drilled grid is suitable for all flanged fittings that can be oriented as needed.
- Collar for the discharge of the bidet soundproof.
- The box is complete with BUAK eccentric bushings, M12 threaded rods and protections.
- Distance between the threaded bars M12 to 180 mm or 230 mm.
- 180 mm long threaded bars.
- Frame tested at 400 kg according to UNI EN 997 (WC) and UNI EN14528 (bidet).
- Premium can be used with any type of cassette.
- Adjustable feet from 0 to 13 cm and can also be used horizontally to expand the base.
- Side or deep flaps for applications in front of the wall.
- Shaped stiffeners for a better grip of the mortar.

APPLICATIONS

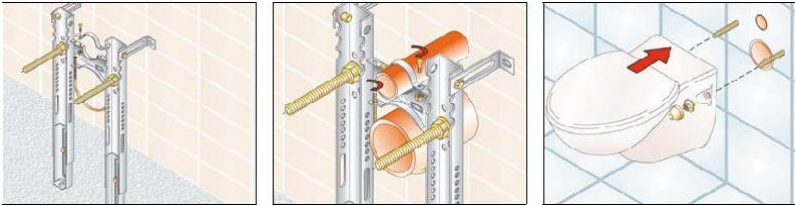

- 42898: WC and bidet suspended on load-bearing walls.

OPERATION

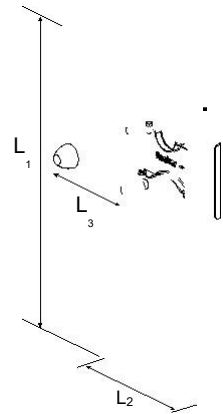

- Insert the M12 bars with the red guard into the holes on the frame with a 180 mm or 230 mm centre distance.
- Adjust the bracket feet to the required height.
- In case of bidet installation, screw the pre-drilled grid and fold the tab in the center to install the threaded bar that supports the collar.
- Install in the wall and rinzaaffare.
- Remove the red protection from the bar, install the sanitary and fix the nuts, cover with BUAK bushings if necessary.
